About me

I have been in constant contact with computer technology since 1983. In 1996 i made software development my profession and had the opportunity to get in touch with various technologies and methodologies in the IT and financial industry. I founded the enterprise Topincs GmbH in 2015 to market my 4GL online database software.

Experience

Topincs, Germany

CEO, May 2015 - Present

I am CEO of the Topincs GmbH, an enterprise for 4GL online databases located in Germany.

Freelancer, Austria and Germany

Software Developer, July 2005 - April 2015

I am freelancing as a software developer focusing on Internet, Java and semantic technologies.

Deutscher Investment Trust, Germany

Software Developer, April 2003 - June 2005

I was responsible for document and chart generation for a software supporting the work of financial advisors. My activities covered all stages of the development cycle.

Credit Suisse Financial Planning Solutions, Germany

Software Developer, November 2001 - March 2003

I was responsible for software development in the area of document and chart generation within a web application for financial consultants. Fields of activity were architecture, specification and implementation.

Apollo Media Management, Austria

Web Developer, April 2000 - October 2001

I had responsibilities in development and customizing of a web application for media management. Other activities covered evaluation of new technologies and maintenance of production environments.

Freelancer, Austria

Software Developer, October 1996 - January 1999

I completed many development projects for Internet, database, and multimedia applications for various companies. Activities were database administration, programming and design, planning and developing client software, and consulting in questions regarding information technology.
